

- Project Title
Face-Mood-Music
 - Team Members
Siraj, Andrew, Nuno, Jay
 - Project Description
User takes a selfie on HTML/JS webpage GUI. Uses facial recognition API to determine the 'mood' and pull playlist to match/change mood based on the facial mood, time, etc.
 - Sketch of Final Product
 - APIs to be used
https://www.kirupa.com/html5/accessing_your_webcam_in_html5.htm
<https://market.mashape.com/faceplusplus/faceplusplus-face-detection>
<https://developer.spotify.com/documentation/web-api/reference/browse/get-list-categories/>
 - Rough Breakdown of Tasks
 - Make rough draft of Webpage (no JS necessary).
- WebJS (Look up)
- Microsoft API
 - Add IDs/Classes (subject to change)
 - Read and research each of the APIs. Be sure to document, a sample call and sample data (JSON) dump.
 - Create GitHub repo with the team members.
